

DIGITAL VAULT · SUCESIO

Estate inventory

Complement to your notarial will — Sample

John SMITH

Born on 12/03/1968 · 42 Baker Street, London W1U 8ED, United Kingdom

Vault code: **SUC-XKZ7-M2Q4**

Generated on 18 July 2026 · 9:05 PM (Europe/London)

This document is automatically generated by Sucesio from the information recorded by the holder in their digital vault. It does not replace an authentic will, nor the intervention of a notary as part of the settlement of the estate. Sucesio acts solely as a technical custodian. Sensitive data is encrypted AES-256-GCM at rest and decrypted only at the moment this document is generated.

SAMPLE

HOW TO USE

How to use this document.

This document is intended for the notary, the executor and, when the time comes, the designated heirs. It brings together in a single inventory all the assets, liabilities and transmission instructions that the holder recorded during their lifetime in their Sucenio digital vault.

01 · Read the inventory

The following pages present in order: assets (physical, financial, digital), informational liabilities, designated heirs, personal messages ready for delivery, and the testamentary clause to copy into the holographic will.

02 · Activate the transmission

To access sensitive details (passwords, IBAN, access keys, personal messages) and trigger the transmission to the heirs, contact Sucenio by presenting the vault reference code shown on the cover and at the bottom of every page. Activation follows a proof-of-life protocol with human confirmation by the trusted contact.

03 · Security guarantees

Content encrypted AES-256-GCM at rest. Three Shamir 2-of-3 keys split between the holder, Sucenio and an independent third party: two are needed to reconstruct the master key. Final human validation by a member of the Sucenio team, never by an algorithm.

SECTION 1 — ASSETS

Estate inventory — assets.

Assets are classified by category (physical, financial, digital) and linked to a designated heir when the holder specified one. Sensitive details (account numbers, passwords, keys) are encrypted and do NOT appear in this document — they are only accessible after activation of the transmission protocol.

Asset name	Category / Type	Designated heir	Added
Main current account	Finance · Bank account	Mary SMITH	12/01/2026
Primary residence — London	Physical · Real estate	Mary SMITH	12/01/2026
Ledger Nano X wallet	Digital · Crypto wallet	Peter SMITH	18/01/2026
Investment ISA — Hargreaves Lansdown	Finance · Investment	Mary SMITH	22/01/2026
Safe deposit box — HSBC	Physical · Bank vault	Mary SMITH	22/01/2026
LinkedIn account — J. Smith	Digital · Social network	Peter SMITH	04/02/2026
Life insurance policy — Aviva	Finance · Life insurance	Mary SMITH	04/02/2026
Google Photos archive (2005-2026)	Digital · Cloud	Peter SMITH	12/02/2026
Vintage Raleigh bicycle 1978	Physical · Valuable object	Peter SMITH	12/02/2026
Cash ISA — Nationwide	Finance · Savings	Mary SMITH	01/03/2026

10 assets recorded — including 3 digital and 3 physical.

SECTION 2 — LIABILITIES

Informational liabilities inventory.

This information is not transmitted to a specific heir. It is included in the inventory delivered to your executor, your notary and your general heirs, to facilitate the settlement of the estate.

Liability name	Category / Type	Status	Added
Mortgage — primary residence	Loans · Real estate	Active	12/01/2026
Authorised overdraft — current account	Loans · Overdraft	Active	12/01/2026
Monthly Adobe Creative Cloud subscription	Subscriptions · Software	Active	18/01/2026
Self-assessment tax owed HMRC	Charges · Tax	Active	22/01/2026

Note: exact amounts and specific creditors are kept encrypted and do NOT appear in this inventory to avoid any risk in case of physical loss of the document. The notary can request them via protocol activation.

SECTION 3 — HEIRS

Designated heirs and beneficiaries.

These persons have received **no notification** of their designation during the holder's lifetime. They will only be contacted at the moment of protocol activation, with a secure link giving access only to the information intended for them.

Name	Relationship	Contact
Mary SMITH	Spouse	mary.smith@example.com +44 20 7946 0958
Peter SMITH	Child	peter.smith@example.com +44 20 7946 0102

Trusted contact

Person designated by the holder to confirm their death and trigger the opening of the protocol. Has access to NO content of the vault.

Sarah MILLER Solicitor — Miller & Partners LLP	sarah.miller@example.com +44 20 7946 0774
--	--

SECTION 4 — MESSAGES

Personal messages ready for delivery.

The holder has prepared the following messages for delivery to their loved ones. The content remains encrypted until the moment of transmission — only the title, recipients and delivery condition appear in this document, for inventory purposes.

Message title	Recipients	Condition	Att.
For Mary — What I never dared to write	Mary SMITH	At the moment of transmission	Yes
To my son Peter — when you turn 40	Peter SMITH	Date-triggered: 15/09/2035	No
Family recipes and holiday memories	All heirs	At the moment of transmission	Yes

3 messages prepared and ready for delivery at the appropriate time. The content of each message remains encrypted server-side until protocol opening.

SECTION 5 — TESTAMENTARY CLAUSE

To copy into the holographic will.

Here is a clause template to copy into your holographic will or hand to your notary. You can adapt it — this is a template, not legal advice.

*"I, the undersigned **John SMITH**, born on 12/03/1968, residing at 42 Baker Street, London W1U 8ED, United Kingdom, declare that I have set up a digital vault with the **Sucesio** service (sucasio.io), under reference **SUC-XXZ7-M2Q4**.*

This vault contains the inventory of my digital and physical assets, the identity of my designated heirs, and personal messages intended for my loved ones.

I request my notary, my executor and my heirs to contact Sucasio (support@sucasio.io) after my death, by presenting my vault reference and an official death certificate, in order to trigger the transmission of its contents according to the instructions I have deposited during my lifetime.

This clause complements my testamentary provisions. It does not replace them."

Indicative template. For any binding wording, seek advice from your notary or a specialised lawyer.

SECTION 6 — INTEGRITY

Document integrity fingerprint.

The SHA-256 fingerprint below is calculated on the entire structured data recorded in the vault at the moment this document is generated. Any subsequent modification of the vault content would produce a different fingerprint. This fingerprint allows a notary or a trusted third party to verify that the document presented corresponds to the vault version at the date of generation indicated.

SHA-256 fingerprint:

9f3c2a1e8b5d7c4f6a2e9b1d3c5f7a8e

0b2d4c6f8a1e3b5d7c9f1a3e5b7d9c2f
